ASSEMBLY INSTRUCTIONS

1. Attach the Storage Compartment Lid on the 27" carrier. (These are pre-attached on the 32" and 36" carriers.)

2. Set the Carrier Bottom on a flat surface and attach the Assembly Buckles. The Yellow Hinges will snap into place on the spaces provided on the Carrier Bottom; keep the Assembly Buckle and Yellow Hinge in a "V" formation while attaching for easiest application.

3. Place the Carrier Top on the Carrier Bottom. Before locking the Buckles, attach the Door by placing the bottom door prong into the hole on the left side of the Carrier Bottom. Lift up on the Carrier Top to insert the top door prong into the Carrier Top. Lower the Carrier Top so it rests on the Carrier Bottom, then secure them together by locking the Assembly Buckles.

4. To Operate the Door, squeeze the tabs to disengage the spring-loaded prongs, then swing the door open. Push the orange tab to lock.

CARRIER OPTIONS:

Many airlines require travel carriers to be secured with metal screws or bolts for checked pet carriers. To secure your Skudo for airline travel, use the Barrel Nuts and Screws provided. There are two holes in the back of the Skudo and two in the front on either side of the door. Please note that the holes on the sides of the carrier are not to be used with metal hardware; these are for use with optional plastic zip ties (sold separately). To install the metal hardware, place a washer over the screw and push it up through the hole in the bottom half of the Skudo. When the screw is exposed on the top half, place a second washer over the screw and secure it with the Barrel Nut. Always check with your air carrier prior to booking to ensure you are following your airline's specific travel requirements.

TO ATTACH OPTIONAL CASTERS: ** 1400CASTER Sold Separately

Turn the carrier upside down and push the tabs on the carrier feet. This will release the caster mounts. Slide the casters into the caster mounts, then re-attach the caster mounts to the Carrier Bottom.
